## WACO, TEXAS

The method of handling our Customers' Cotton without commission having proved so entirely satisfactory last year, has influenced us in adopting the same plan for the coming season. We will receive and promptly dispose of, for account, all consignments from our customers—free of all commissions—guaranteeing them the very best possible classifications and highest market prices. Waco's immense Cotton receipts last year and her advance of 1-2c. to 3-4c. over other markets in the State, established her, beyond all doubt, as THE Cotton market of Texas. There are several reasons to be assigned for the belief that the receipts for the season beginning September 1, 1885, will be equally as large—if not larger—than the shipments of the previous year. We have now located with resident spinners' Agents, who have direct connections with the East and Europe, which virtually throws the Cotton immediately into first hands, thus obviating the heavy expenses, low classifications, delays and increase in freight rates resulting from shipments made through commission merchants over other markets. Our three competitive railroads afford the finest transportation facilities, and insure us lower through and local rates to and from Waco than any other point in the State. In conclusion, we would especially call the attention of our friends to our increased and carefully selected stock, which has received our closest attention in readiness for the large FALL trade, which is now fairly upon us, and our facilities for handling our goods with promptness and safety, and our guarantee to make every transaction mutually satisfactory as well as profitable. Thanking our customers for their past patronage and soliciting a liberal continuance of same, we remain, Yours faithfully,

## BUGLE BLASTS!

New York Democracy Sounds the Call for the Civil-Service Conflict.

It Don't Want and Don't Propose to Have any More Silver Coined.

The President is a Mighty Nice Man, But They Oppose Him All the Same.

Howell P. Flower Gets Second Place on the Ticket With Governor Hill.

NEW YORK DEMOCRACY.

Flower For Second Place.—The Platform.

SARATOGA, N. Y., September 25.—Chairman Rainer called the convention to order at noon, and the chairman of the committee on resolutions announced that the committee was ready to present their report. Before the report was read, Rainer asked unanimous consent for the presentation of a special resolution. It was granted and General Roger A. Pryor was recognized by the chair. He said: "I have the honor to submit the following resolution for acceptance by this convention: Resolved, That with profound sorrow the democracy of the state of New York, lament the death of that indestructible patriot and invincible soldier, Ulysses S. Grant, [applause] of whose illustrious career they recognize a fitting crown and consummation in his dying invocation of peace and good will between the heroes he led and the heroes he conquered." The resolution was unanimously adopted, every delegate arising to his feet.

THE PLATFORM. It was then read as follows: YORK, in convention assembled, congratulate the people of the whole union upon the election and inauguration of Grover Cleveland, to be president of the United States. We commend the wise and statesmanlike selection of his cabinet, and the selection of the union of these thirty-eight illustrious statesmen, as at last re-established. His firm, considerate and manly conduct as president of these United States, his efficiency in every branch of the official service, and the beneficent result of prosperity and good government which have attended their efforts have justly commended them to the people.

THE STATE GOVERNMENT. "We heartily approve the administration of the state government by Governor David D. Hill for his ability and his efficient democratic associates in the departments for their fidelity to principle, their devotion to official duty, strict regard for public interests, unceasing efforts to secure economy and efficiency in the expenditure of the official service, and the beneficent result of prosperity and good government which have attended their efforts have justly commended them to the people.

THE STATE CENSUS. "An enumeration of the inhabitants of the state as demanded by the constitution is all that is necessary for purposes of equitable district representation as the elaborate census taken by the federal government, and the complete information as to the progress and resources of the state, and to duplicate this work and expense would therefore be a waste of public money.

CIVIL SERVICE REFORM. "We re-affirm the declarations of the democratic national conventions of 1876, 1880 and 1884 in regard to the necessity of reforming the civil-service, but we cannot add the actual abolition of the existing civil-service as the same has been executed by the republican party. They have abused its provisions for the purpose of retaining republicans in office. They have formulated a list of eligibles composed almost exclusively of republicans and they have extended the period of the law, those eligible for appointment to office should remain on the registers so as to exclude democrats from all offices within the rules of the civil service.

"We ask that the commission at Washington be reorganized so that its majority may be in sympathy with the administration; that both parties be fairly represented on the examining board, and that the present list of persons eligible for appointment be annulled. "While, therefore, proclaiming our approval of the general spirit which inspired the recent legislation of the federal government and of

## RUSSIAN RUSES!

There is Evidently a Supply of Them in the Roumelian Racket.

If Turkey Enters Bulgaria or Roumelia I Will Fight Her, Says the Czar.

Turkey is Much Troubled Over the Situation and Changes Her Ministers.

The Other Nations Becoming Aroused to the Great Gravity of the Occasion.

RUSSIA.

The Czar Will Support Bulgaria.

ST. PETERSBURG, September 25.—Feeling in St. Petersburg regarding the Roumelian question is becoming more warlike. The sympathy of the masses is strongly with the Bulgarians.

It is stated the czar has telegraphed the minister of war to prepare plans for a campaign in the event of the opening of hostilities between Bulgaria and Turkey, as he is determined to support Prince Alexander's scheme of unity between Bulgaria and Roumelia.

FRANCE.

Roumelians Not so Enthusiastic.

PARIS, September 25.—A dispatch from Philippopolis to the Temps says the enthusiasm of people there over the revolution is waning, and the feeling in favor of a union with Bulgaria is dying out. Large numbers of the Roumelians, the dispatch says, are emigrating to Servia in order to avoid military service. All able-bodied Servians now in France have been ordered by their government to return to Servia forthwith.

ANXIOUS TO AVOID AGITATION.

PARIS, September 25.—The French government has asked the co-operation of the other powers in urging on the governments of Servia, Roumelia and Greece the necessity of avoiding all agitation respecting the Roumelian difficulty and not to allow anti-Turkish demonstrations during the present excited state of feeling in the Balkans.

WHAT TURKEY HOPES FOR.

PARIS, September 25.—The changes in the Turkish ministry are understood as having been made in a conciliatory mood. The Turkish government hopes to have the support of the great powers in its stand regarding the revolution in Roumelia.

TURKEY.

The Cabinet Entirely Changed.

CONSTANTINOPLE, September 25.—The ministers have been dismissed and a new cabinet formed with the following changes: Kienut Pasha is grand vizier in place of Said Pasha, dismissed; Said Pasha recently ambassador at Berlin is minister of foreign affairs in place of Asim Pasha, dismissed; Munir Pasha, lately dismissed from the office of minister of finance is minister of the interior in place of Eshem Pasha, appointed ambassador at Paris; Soler Pasha is minister of justice in place of Hassan Pasha, dismissed; Arif Pasha is president of the council in place of Atif Pasha, dismissed. Enver Pasha, ambassador at Berlin, has been transferred to Berlin.

Servians Summoned Home.

SOFIA, September 25.—The Servian government has summoned all Servians now in Germany to return home at once for military duty.

GREECE.

Indignant at Roumelian's Act.

ATHENS, September 25.—Five thousand troops of the reserve force have been formed into an army corps and branches of the army, are marching on the frontier bordering on Thessaly. A feeling of indignation prevails throughout Greece over the recent events in Roumelia. The King will be unable to land before noon Monday owing to the quarantine regulations.

## ENGLAND.

Servian Seeking Assistance.

LONDON, September 25.—A dispatch from Belgrade says twelve Servian battalions have gone south and traffic between Servia and Roumelia has been suspended. General

## More About the Cyclone.

LONDON, September 25.—Reports have been received here of a cyclone at Calcutta, in which several ships foundered and a great many persons were drowned.

A Conference of the Treaty Powers.

LONDON, September 25.—The signatory powers of the treaty of Berlin are in favor of a conference of the treaty powers for the settlement of the Roumelian difficulty.

England Waking Up.

LONDON, September 25.—A cabinet council has been hastily summoned for to-morrow. It is said that the Roumelian difficulty will be the subject of discussion.

ITALY.

The Pope Will Mediate.

ROME, September 25.—The pope has agreed to mediate between Germany and Spain, with regard to the Caroline's question, subject to certain conditions which have not yet been promulgated. Telegraphic communications are now progressing with a view of establishing the ground upon which negotiations may be continued.

Italy's Cholera Report.

ROME, September 25.—Cholera reports from Palermo for the past twenty-four hours show 176 new cases and ninety-four more deaths. During the same period there were seven new cases and five deaths. Several cases are reported from other points.

AUSTRIA.

A King Assassinated.

VIENNA, September 25.—It is rumored here to-night that the King of Servia has been murdered. The report however is not confirmed.

SPAIN.

Spain's Plague Dying Out.

MADRID, September 25.—There were 713 new cases of cholera and 248 deaths from the disease reported throughout Spain yesterday.

WASHINGTON.

Mr. Santos' Sad Story.

WASHINGTON, September 25. Julio R. Santos, the naturalized American United States government, backed up by a man of war, arrived here today in company with the United States Consul, and called at the department of state to express his thanks for his successful efforts in his behalf. To a reporter of the Associated Press, Mr. Santos said: "I have liberated him in consequence of the passage of an act of pardon by the Ecuadorian congress, but, this Mr. Santos says, was a mere pretext. He was liberated three days after the arrival of the troops and wholly in consequence of the action of the United States government. The charge against him of having conspired against the government of Ecuador was, he declared, untrue; he was imprisoned with other business men in order that money might be extorted from him. He has documented proof of the willingness of the authorities to release him at any time on the payment of \$30,000. He was confined for a time in an unwholesome and filthy cell, and was threatened with a prison in the basement of the yellow fever hospital.

Mr. Santos will employ counsel immediately, and will file a claim for damages with the state department, against Ecuador.

Routing in the Smith Court-Martial.

WASHINGTON, September 25.—The supreme court of this district today decided not to hear further argument upon the petition of Paymaster-General Smith, praying that the secretary of the navy and the court-martial be removed from further proceedings against Smith, and rendered a decision adverse to the petition. The petitioner's counsel noted an appeal to the supreme court of the United States and the court issued its writ of error. It is expected the hearing will take place during the first week of the term of the supreme court, which begins October 27th. The proceedings will doubtless be further delayed until decisions have been reached.

Decrease in Exports and Imports.

WASHINGTON, September 25.—The chief of the bureau of statistics reports that the total values of the imports of merchandise during the two months which ended August 31, 1885, were \$27,235,935 and during the twelve months which ended August 31, 1884 \$67,871,316; a decrease of \$40,635,373.

## CUSTOMS "TIPS."

Some Very Fraudulent Practices Unearthed in New York City.

A Mother Drops Dead While Waiting to Testify at a Daughter's Trial.

Great Floods in Mexico Stop all Railway Transit to the United States.

Chinamen of Wealth Much Disturbed and Fearsful of Further Riots.

CUSTOMS FRAUDS.

Unearthed Some Big Sneaks.

New York, September 25.—The Times this morning says: "Numerous complaints of fraud arising from under-valuation and re-appraisal of imported merchandise, indicted Secretary Manning, a short time ago to commission three United States special agents to make an investigation. These three agents have been at work here for several days, and their results, if made public at all, must first be filtered through the treasury department.

It is not generally known, but three large importing houses of this city have lately paid to the government more than \$120,000 each on re-appraisals of goods which they had been accused of undervaluing. It is doubtful that a dozen of the fifteen New York firms will be pressed to pay into the United States treasury, monies which the government's agents, in the course of their investigation, have unearthed.

A widely signed petition is now in circulation among New York importers asking congress to substitute a specific tariff for the existing rate which is subject to the interpretation of special agents.

Borahermer Will Stir 'Em Up.

New York, September 25.—A dispatch from Washington yesterday, gave the substance of a letter from Secretary Manning to United States District Attorney Dorsheimer, in this city, asking him to stir up the Chinese in the prevalent custom among incoming travelers on ocean steamers of "tipping" the government baggage inspectors. Mr. Dorsheimer is said to have replied to the letter, in which he

"I beg to assure you that your instructions will be carried out and that all the power of this pernicious and most disreputable practice, which first person who shall be found paying an officer money, and the first officer who shall be found receiving money in connection with the law, will be presented to the grand jury and the indictments against them will be promptly brought to trial.

MEXICAN FLOODS.

Railway Traffic Almost Suspended.

CITY OF MEXICO, September 25.—Heavy rains for the last week have played havoc with the track of the Mexican Central railway. The mail train from the United States due in this city two days ago has not yet arrived. It is supposed it will arrive to-night. It was delayed first on the third division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the fourth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the fifth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the sixth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the seventh division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the eighth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the ninth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the tenth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the eleventh division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twelfth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the thirteenth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the fourteenth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the fifteenth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the sixteenth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the seventeenth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the eighteenth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the nineteenth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twentieth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twenty-first division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twenty-second division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twenty-third division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twenty-fourth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twenty-fifth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twenty-sixth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twenty-seventh division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twenty-eighth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the twenty-ninth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the thirtieth division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the thirty-first division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the thirty-second division north of Calera where there were a number of washouts tending at intervals over about ten miles. The train was then delayed on the thirty-third division north of Calera where there were a number of washouts tending at intervals over about ten miles.
